

Willkommen in der Sternwarte zum Väteraktionstag 2014!

Kometen und Sternschnuppen

Früher hatten Menschen Angst vor Kometen.

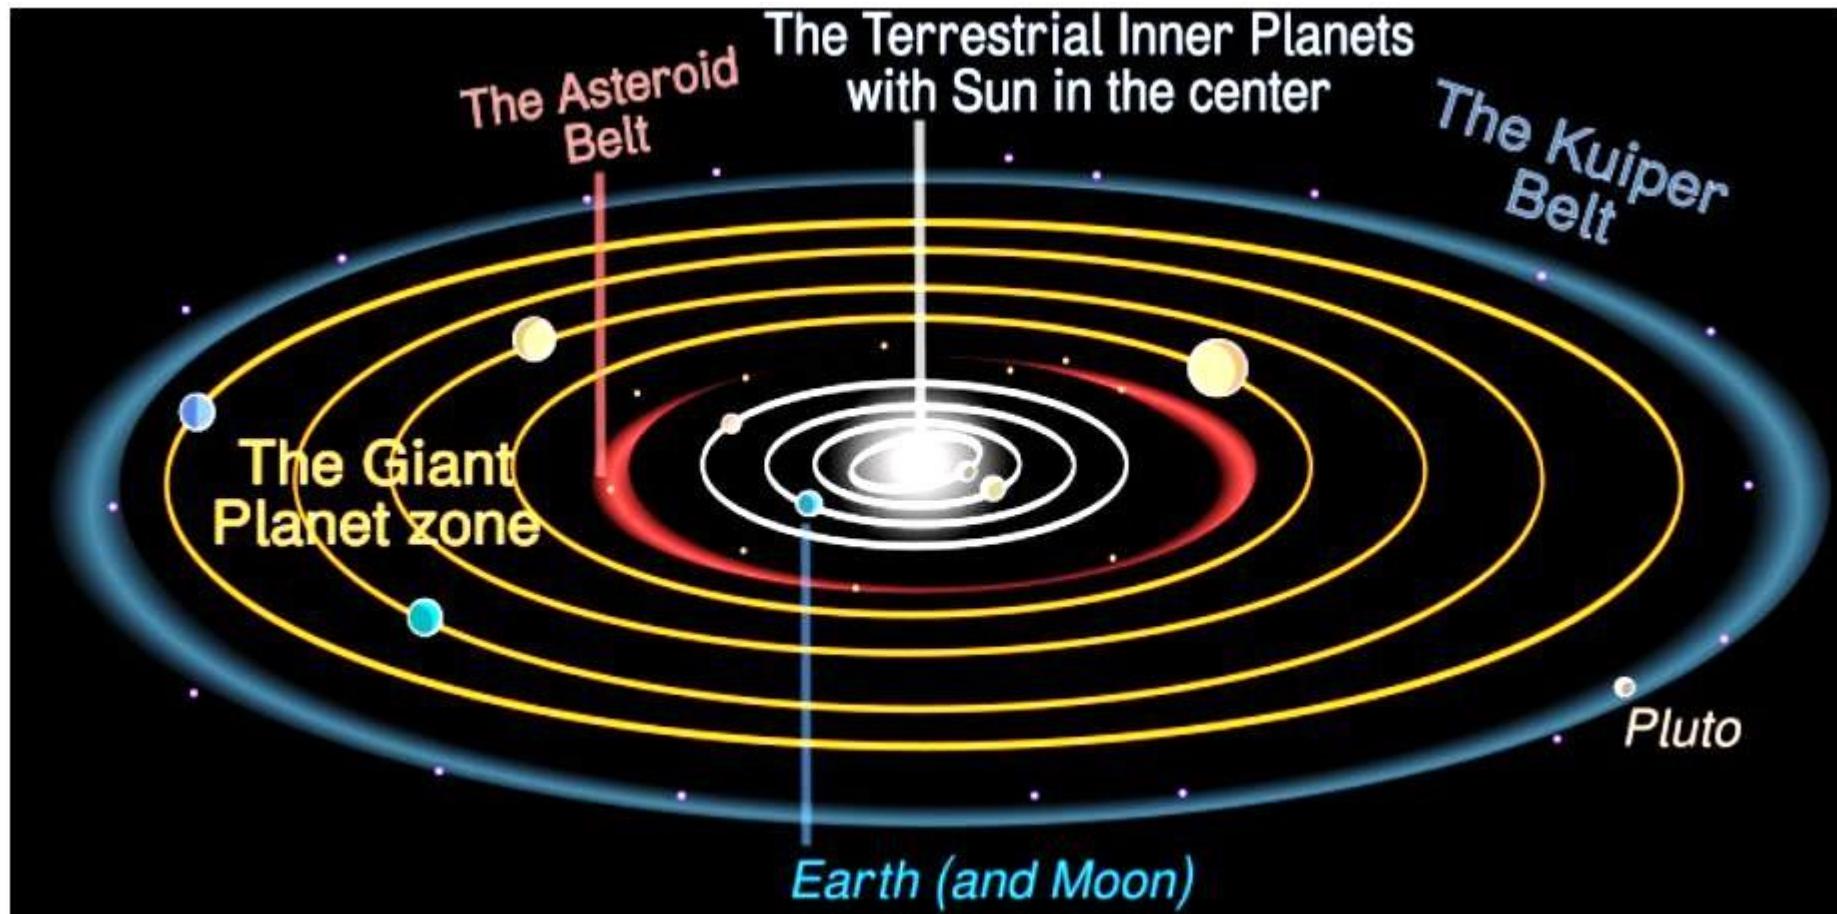

23. Illustrations of two important historical comets taken from Lubienietski's *Universal History of All Comets*, 1681. The AD 1000 illustration shows a blazing thunderbolt with a 'long drawn out tail landing in open space', having 'fallen from a dragon-like comet with a horrendous tail'. The AD 1180 comet was viewed with horror since it had the appearance of a winding serpent with gaping jaws.

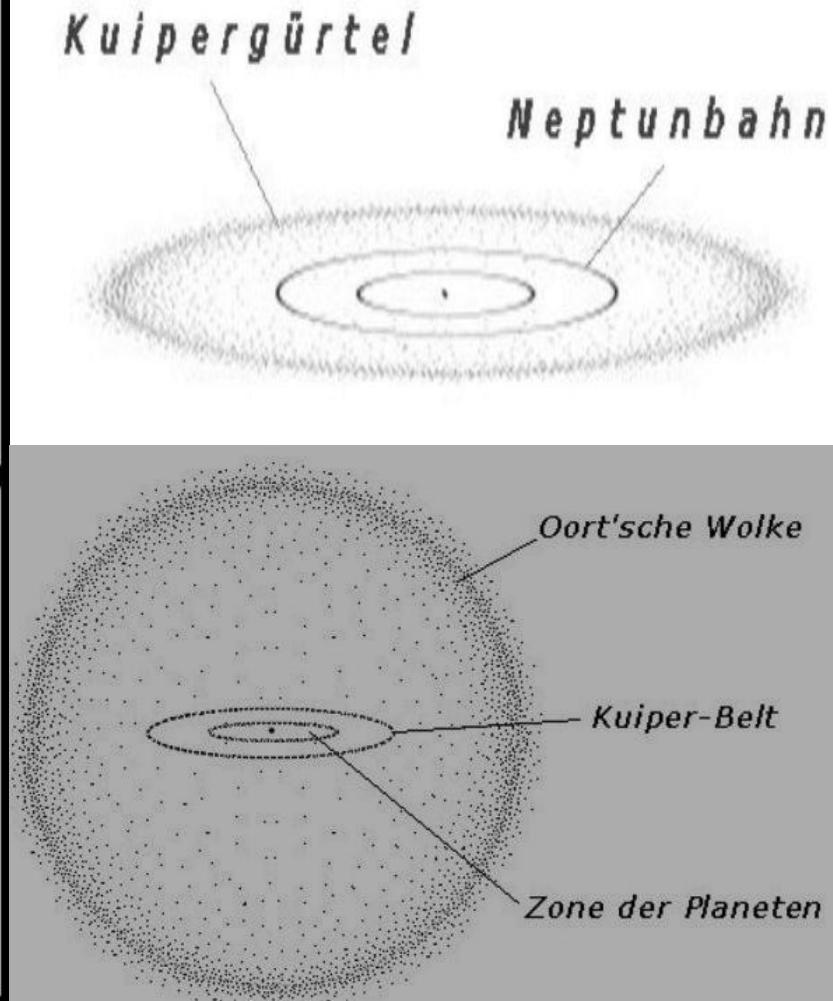

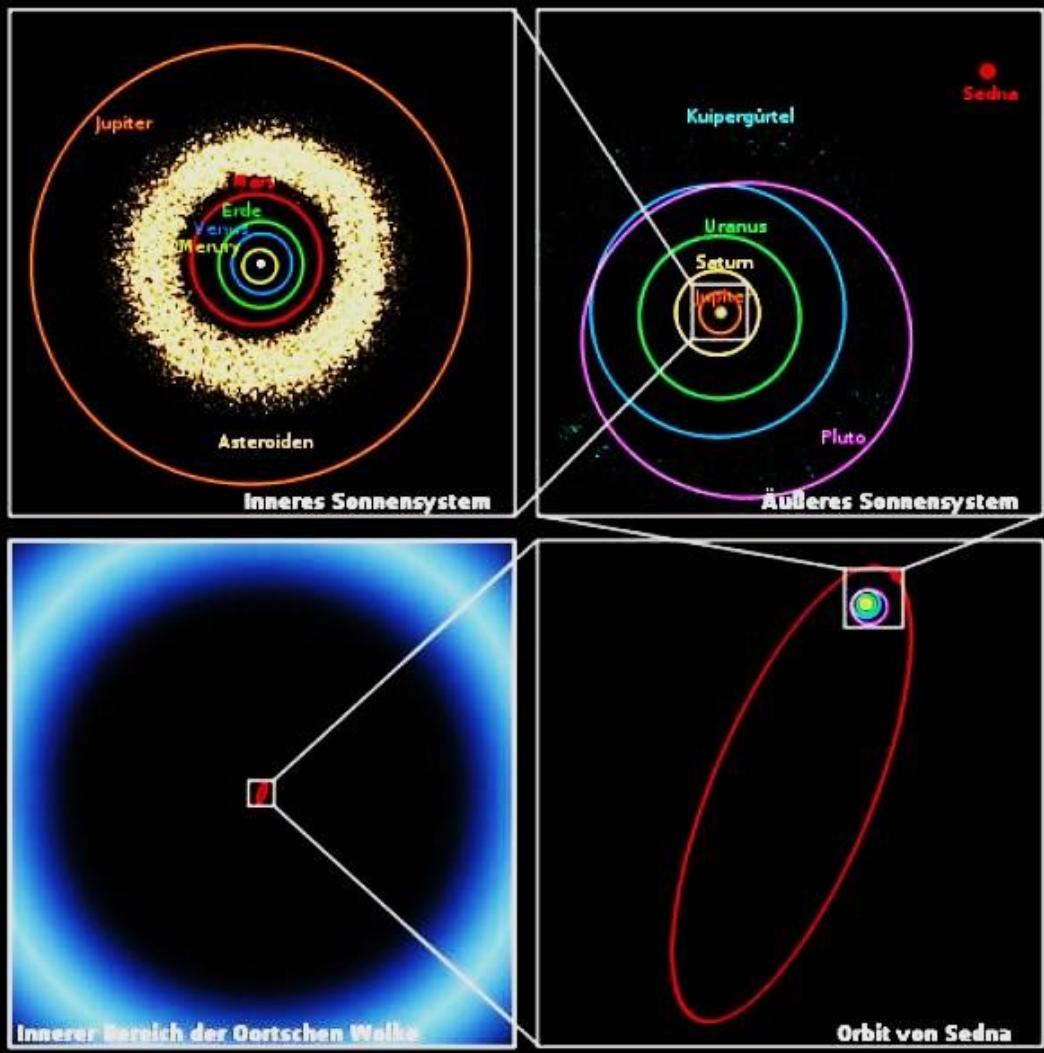

Komet Halley 1910 auch damals war man noch beunruhigt wenn ein Komet auftauchte.

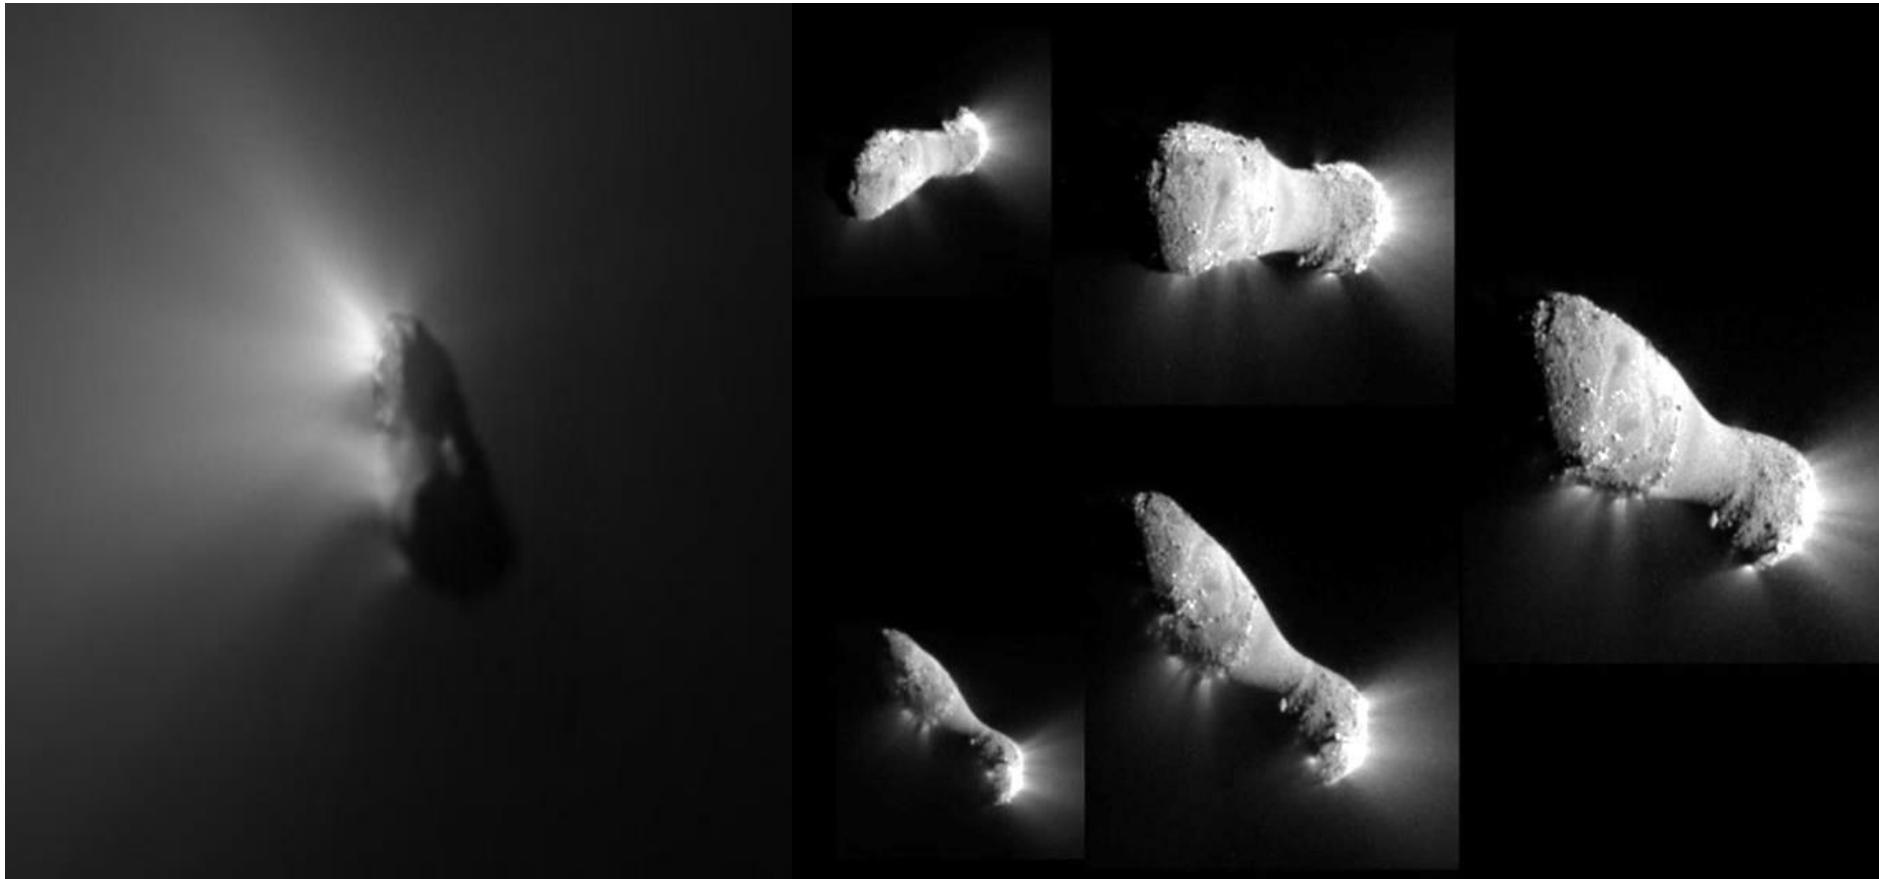

Unser Sonnen System

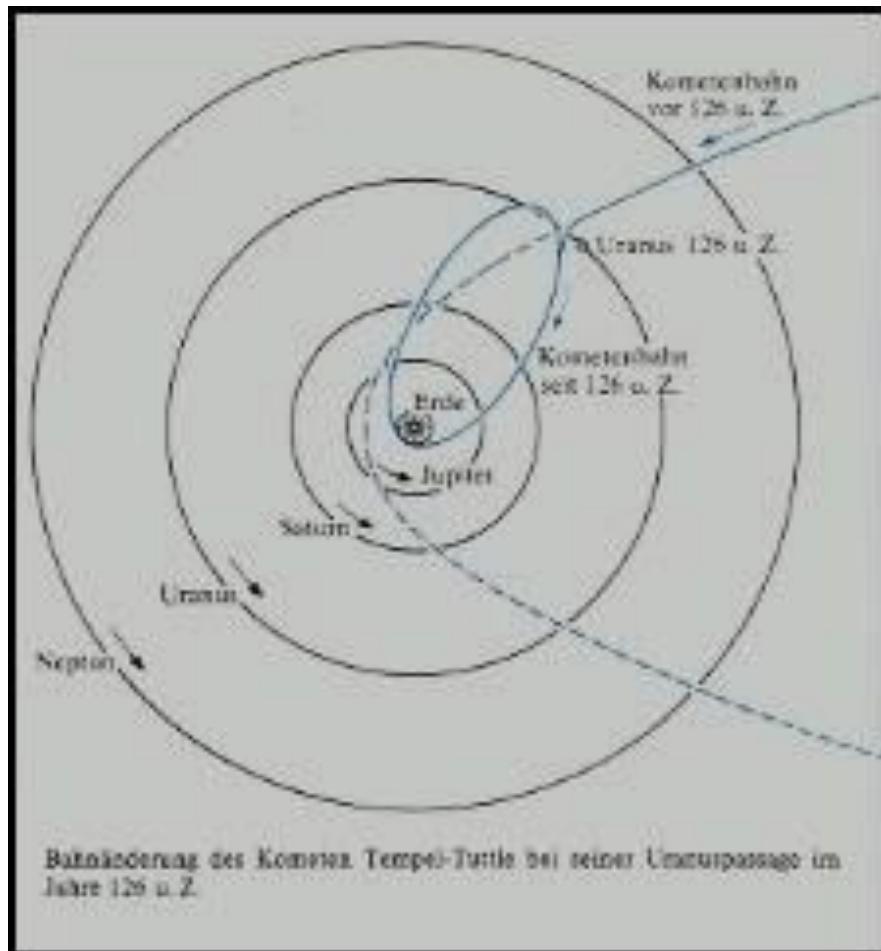

Woher kommen Kometen?

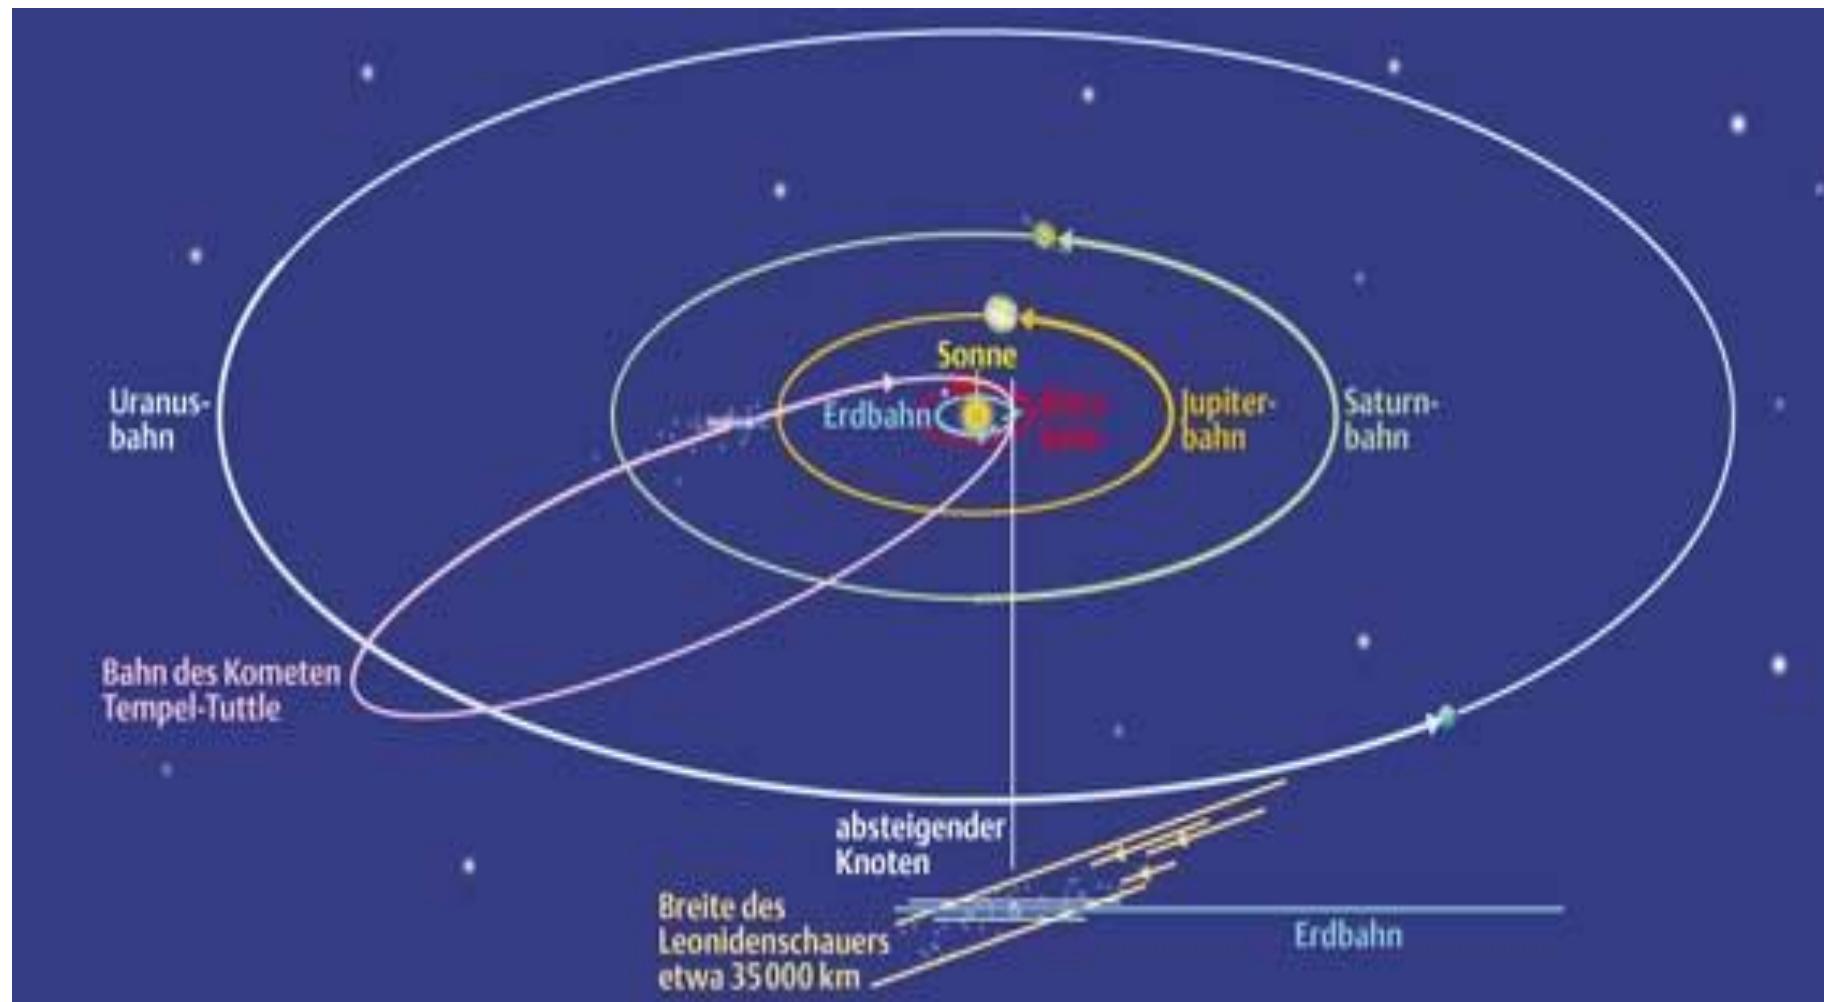

Kometen Kerne Halley und Hartley.

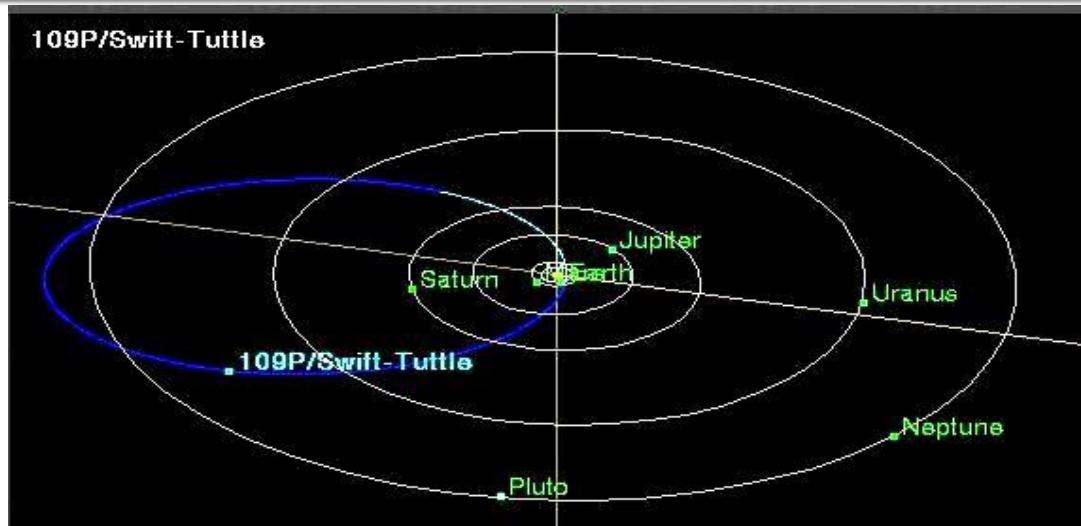

Kometen Bahnen

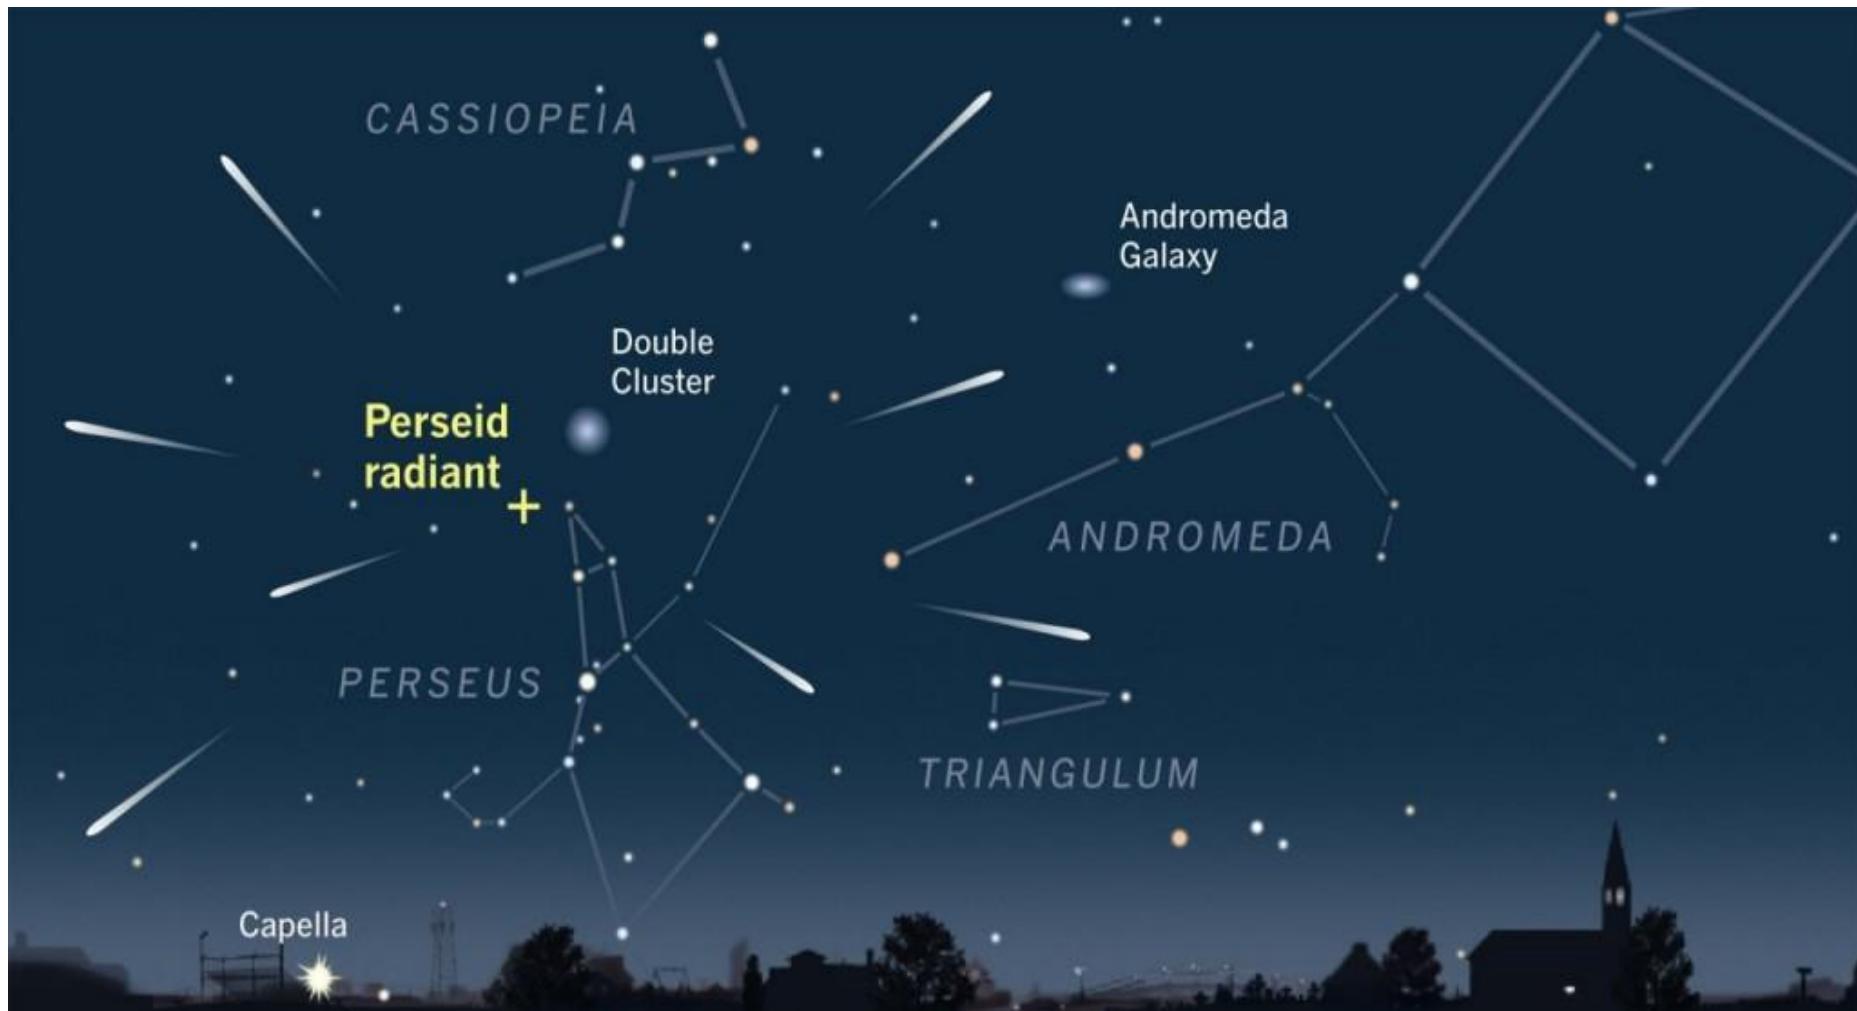

Bahn des Kometen Tempel-Tuttle der Leoniden Komet.

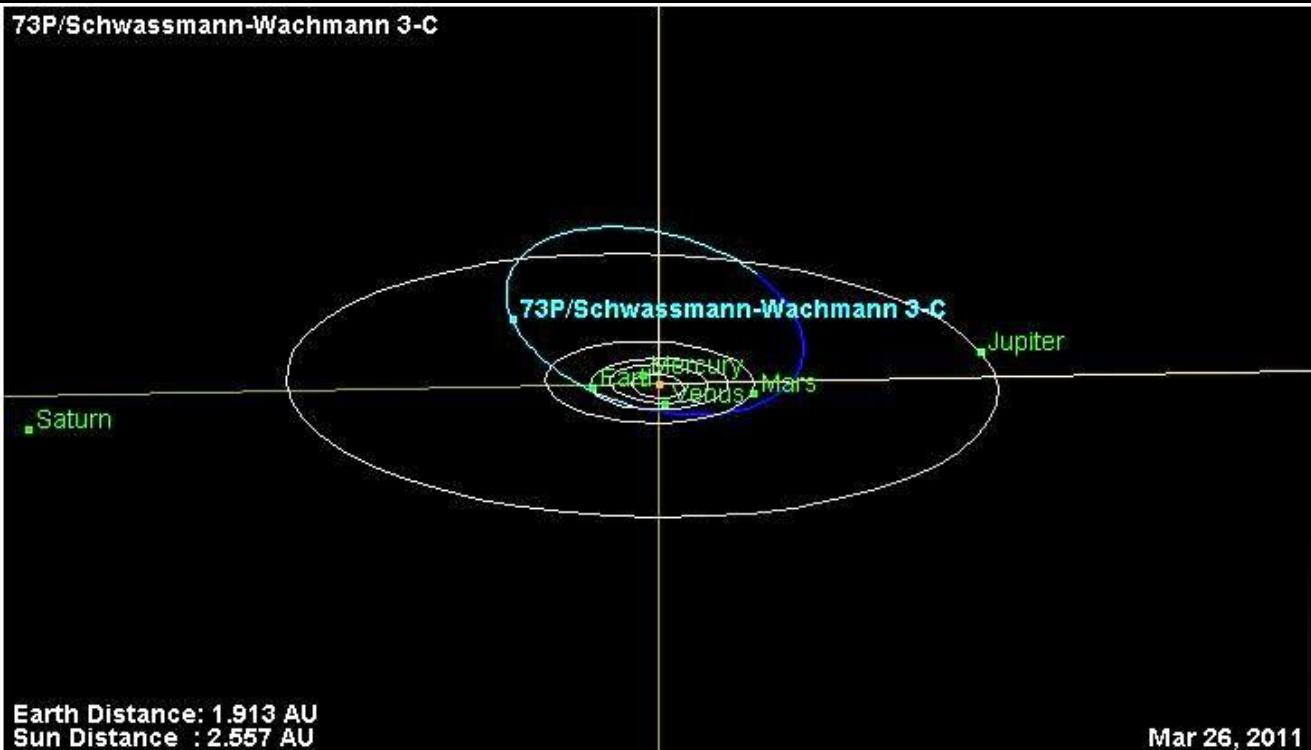

Komet Swift-Tuttle der Perseiden Komet

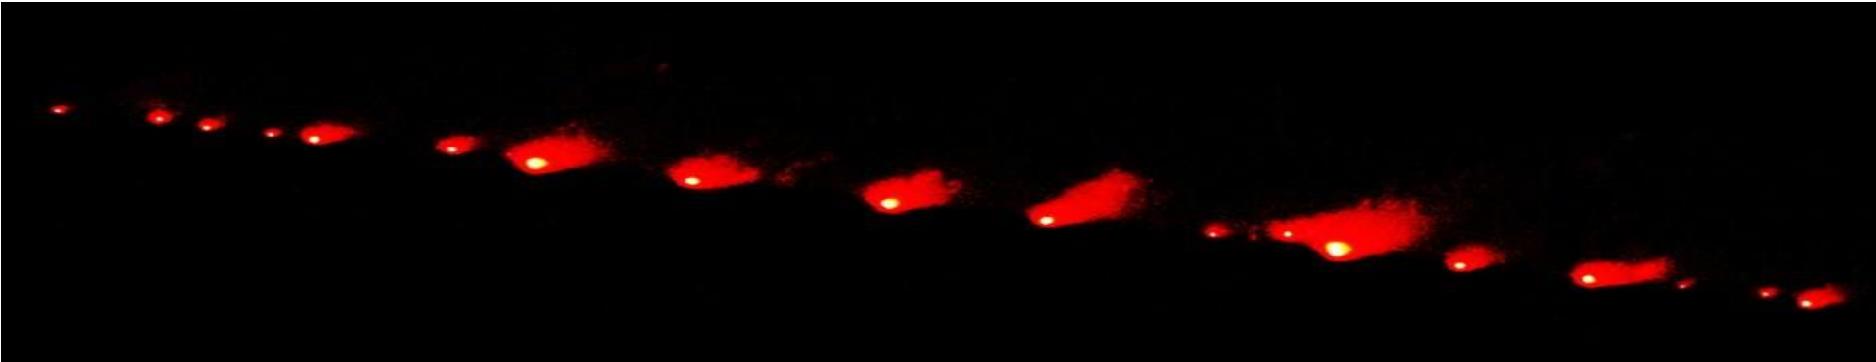

So kommen Sternschnuppen zu ihrem Namen.

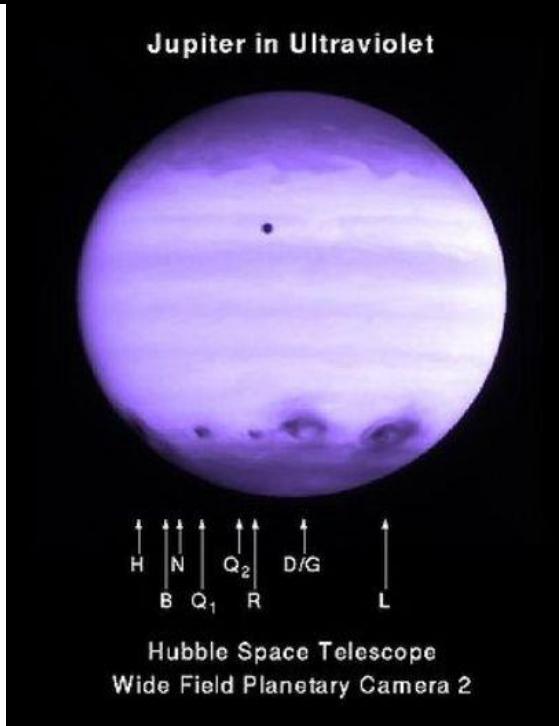

Kometen Bahnen

Komet Shoemaker-Levy 9

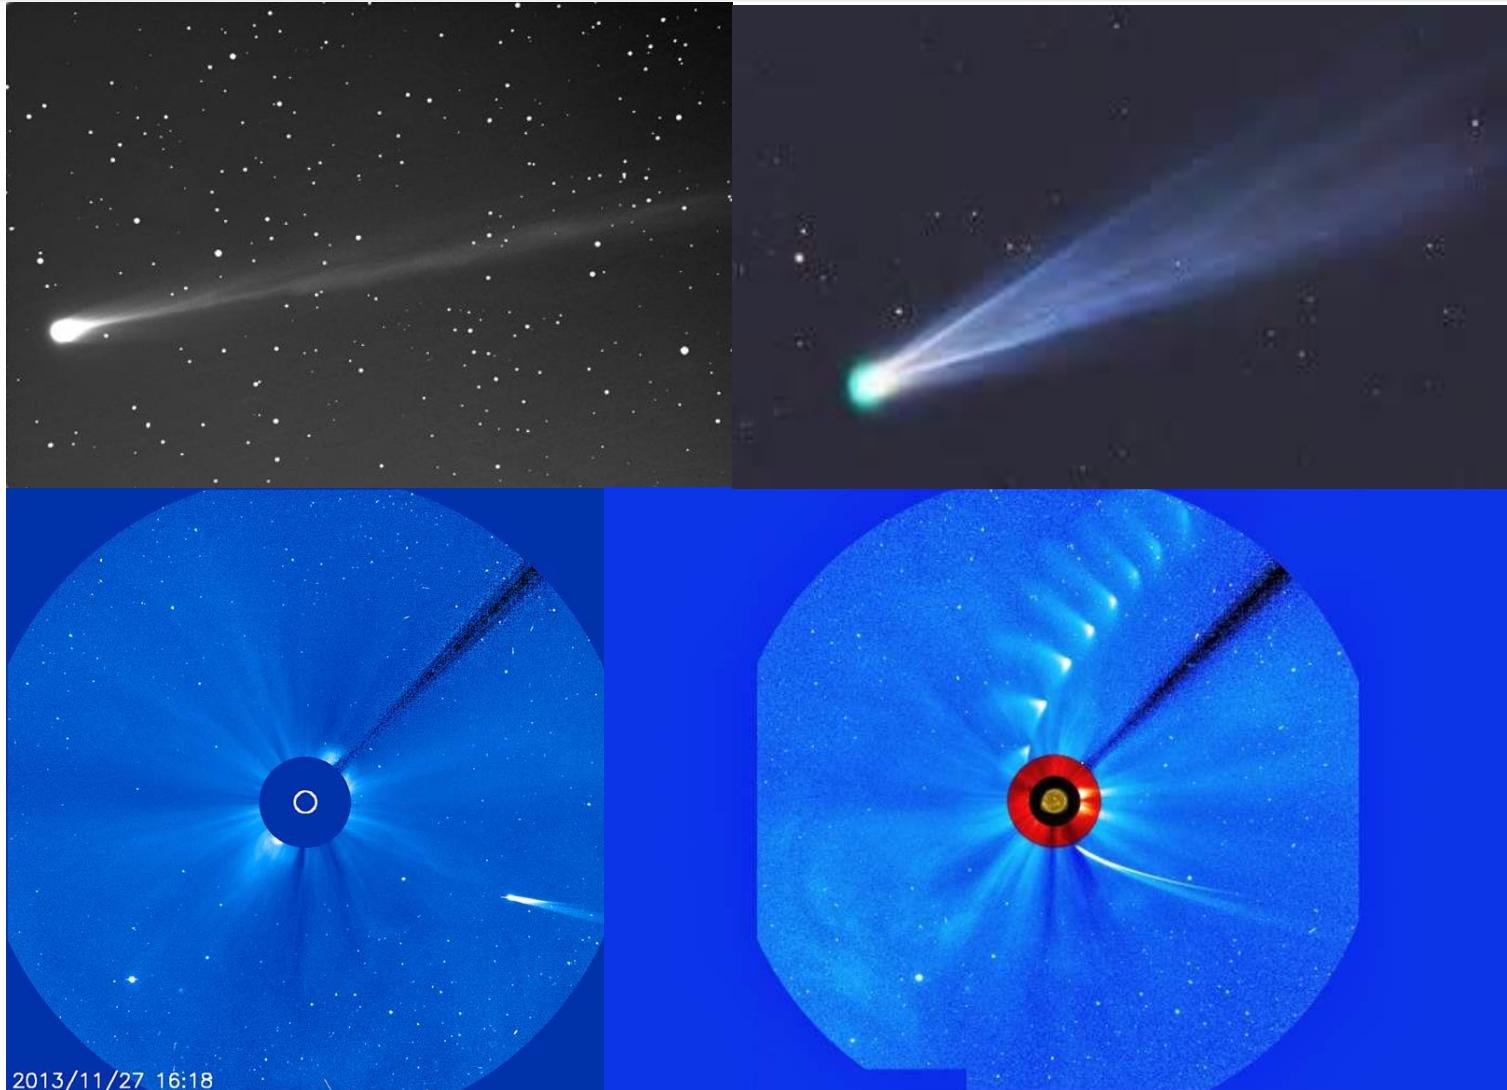

Jupiter in Ultraviolet

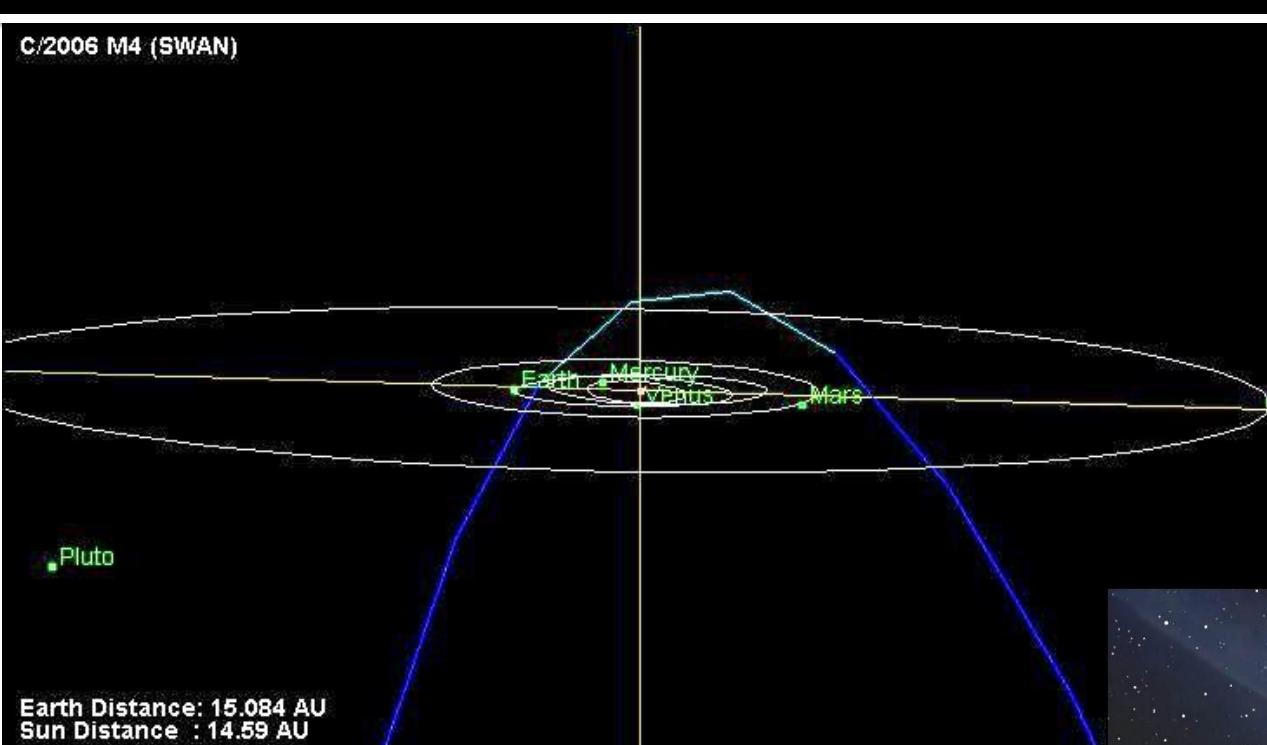

Hubble Space Telescope
Wide Field Planetary Camera 2

Komet ISON

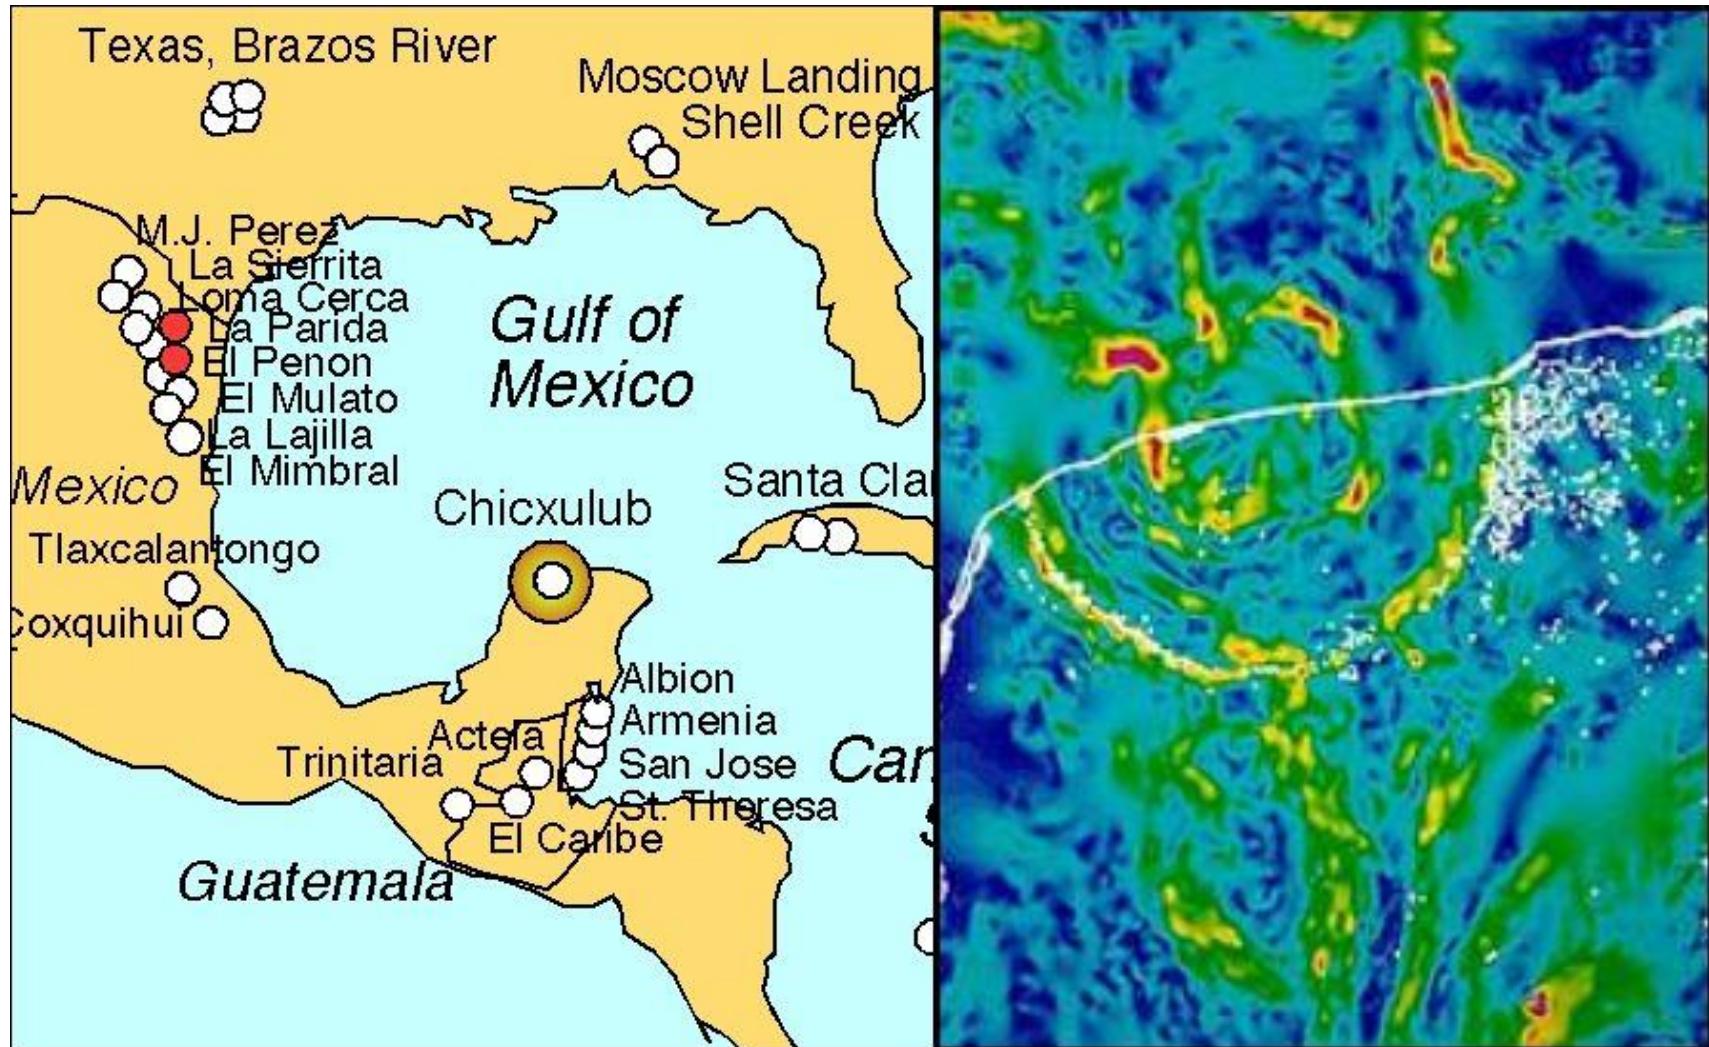

Kometen Bahnen

Komet Hale Bopp

Ein Einschlag der alles veränderte.

Iridium ein Himmelisches Element.
